# CORDLESS IMPACT DRIVER ENERGY+ 18V, LI-ION, WITHOUT BATTERY

BRAND: GRAPHITE

GRAPHITE cordless impact driver, compatible with 18V Li-Ion GRAPHITE Energy+ batteries. The device is designed for screwing and removing screws and bolts in wood, metal and plastics. It allows you to work at high speeds (up to 2200 rpm) and provides high torque (180 Nm). The torque is generated in the form of an instantaneous peripheral impact, which helps to minimize the impact of the device on the operator's hand during screwing. The tool holder 6.35 mm (1/4") is designed to work with the most popular type of screwdriver bits. The device is equipped with an electric motor brake that allows quick stopping of the spindle and LED illuminating the work place. Ergonomic shape of the handle and an optimized total length of the driver allow for effective work in all conditions.

EAN	5902062035400
Battery type	Li-Ion
Total length of the product	200 mm
Sound power level (LWA)	106
Net weight	1115
Number of batteries in set	0
Protection level	III
Total width of the product	75
Battery voltage	18
Total height of the product	195 mm
Type of motor	Brush motor
Revolutions per minute	2200
Minimal revolutions per minute	0
Maximal revolutions per minute	2200
Maximal torque	180
