METHOD OF USE

- 1- Spray directly on the surface at a distance of 30 cm to be sanitized in order to reach all areas affected by the operation.
- 2- See the product with UV lamp to find out if all areas of interest have been reached
- 3- Leave to act for at least a minute
- 4- Wipe with a cloth or disposable paper to remove the dirt
- 5- See with the uv lamp any residues
- 6- If there are any residues repeat step 4
